

John S. Whittington

John S. Whittington grew up near Columbus Indiana. He is the vice-president of Grammer Industries. Grammer specializes in the safe transportation of a variety of hazardous materials including; anhydrous ammonia, propane, nitric acid and compressed gases. John also holds the position of President and CEO of Vickery Transportation another trucking company. Vickery transports liquid hazardous waste for safe treatment and disposal.

Mr. Whittington's latest project is Integrity Biofuels, Central Indiana's first Soy Biodiesel Plant located in Morristown, just east of Indianapolis. This production facility uses soybean oil as its primary feed stock to be converted into Biodiesel. The process incorporates the latest technology and automation to produce some of the finest quality biodiesel fuel in the United States. As co-owner and vice president of Integrity Biofuels John is doing his part toward helping America become energy Independent.

Mr. Whittington graduated with a bachelor's degree from Purdue University in Agricultural Business Management in 1996. Mr. Whittington is active as a member of the American Trucking Associations (ATA), National Truck Carriers, and the National Biodiesel Board. He is currently the Chairman of the Agricultural Food Transporters Conference of the ATA.
